**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>
	10/672,921	WOODHOUSE, DAVID
	<b>Examiner</b>	<b>Art Unit</b>
	William H. Wood	2193

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

1) Responsive to communication(s) filed on 17 August 2007.  
 2a) This action is **FINAL**.                    2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

4) Claim(s) 1-20 is/are pending in the application.  
 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
 5) Claim(s) \_\_\_\_\_ is/are allowed.  
 6) Claim(s) 1-20 is/are rejected.  
 7) Claim(s) \_\_\_\_\_ is/are objected to.  
 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

9) The specification is objected to by the Examiner.  
 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
     Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
     Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
 a) All    b) Some \* c) None of:  
 1. Certified copies of the priority documents have been received.  
 2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

1) Notice of References Cited (PTO-892)  
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)  
 3) Information Disclosure Statement(s) (PTO/SB/08)  
     Paper No(s)/Mail Date \_\_\_\_\_

4) Interview Summary (PTO-413)  
     Paper No(s)/Mail Date \_\_\_\_\_

5) Notice of Informal Patent Application

6) Other: \_\_\_\_\_

  
 WILLIAM H. WOOD  
 PRIMARY EXAMINER

**DETAILED ACTION**

Claims 1-20 are pending and have been examined.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, 7-9, 11-13, 15-16 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by "Efficient Algorithms for Sorting and Synchronization" by Andrew **Tridgell**.

**Claim 1**

**Tridgell** disclosed a method for updating a seed file to match a target file (*page 49-69, chapter 3, rsync*), said method comprising:

generating target file checking data for one or more blocks of said target file (*page 53-54, section 3.2.4*);

storing at least a portion of said target file checking data in a cache, wherein the cache is part of a non-volatile storage device (*pages 93-94, section 5.4, caching web servers; additionally note pages 92-95, sections 5.3 and 5.5*);

receiving seed file checking data corresponding to one or more blocks of said seed file (*page 50, element 1, section 3.2; page 54-55, section 3.2.5*);

comparing said seed file checking data with said target file checking data to identify differences in blocks of said seed file and blocks of said target file (*page 55-58, section 3.2.6*); and

transmitting information for revising seed file blocks which are different from target file blocks such that said seed file blocks match said target file blocks (*page 58, first paragraph of section 3.2.7*).

Claim 2

**Tridgell** disclosed the method of claim 1, wherein said target file checking data and said seed file checking data each comprise weak level checking data and strong level checking data, and wherein said comparing comprises comparing said weak level checking data and next comparing strong level checking data only if a match is identified in said weak level checking data (*page 53-55, section 3.2.4 and 3.2.5; in particular page 54, first paragraph under section 3.2.5*).

Claim 3

**Tridgell** disclosed the method of claim 1, wherein said target file checking data and said seed file checking data each comprise a 32-bit checksum and a 128-bit checksum (*page 53-55, section 3.2.4 and 3.2.5*).

Claim 5

**Tridgell** disclosed the method of claim 1, wherein said target file checking data and said seed file checking data each comprise a checksum (*page 53-55, section 3.2.4 and 3.2.5*).

Claim 7

**Tridgell** disclosed the method of claim 1, further comprising decompressing said target file prior to said generating (*page 76, section 4.4.1, second paragraph*).

Claim 8

**Tridgell** disclosed the method of claim 1, wherein said seed file and said target file are decompressed prior to said generating, wherein said seed file blocks are revised in accordance with said transmitted information to match said target file blocks, and wherein said revised seed file blocks are recompressed after revising (*page 76, section 4.4.1, second paragraph*).

Claim 9

**Tridgell** disclosed the method of claim 8, wherein said seed file comprises a compressed payload, previously separated from a compound file, and wherein said revised seed file is appended to a header file after said recompressing to

constitute a revised compound file (*page 76, section 4.4.1, first and second paragraphs; compressed file formats*).

**Claims 11-13, 15-16 and 18-20**

The limitations of claims 11-13, 15-16 and 18-20 correspond to claims 1, 2, 5, 8 and 9 and therefore are rejected in the same manner.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4, 6, 10, 14 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over "Efficient Algorithms for Sorting and Synchronization" by **Andrew Tridgell**.

**Claims 4 and 17**

**Tridgell** disclosed the method of claim 1, wherein said target file checking data and said seed file checking data each comprise weak level checking data and strong level checking data, and wherein said storing comprises storing said weak level checking data associated with said target file (*page 53-55, section*

*3.2.4 and 3.2.5; in particular page 54, first paragraph under section 3.2.5).*

**Tridgell** did not explicitly state *and storing only said strong level checking data associated with said target file expected to match strong level checking data associated with said seed file*. However, **Tridgell** demonstrated that it was known at the time of invention to use the strong level checking data sparingly (*page 53-55, section 3.2.4 and 3.2.5; in particular page 54, first paragraph under section 3.2.5*). It would have been obvious to one of ordinary skill in the art at the time of invention to compute and thus store strong level data only as anticipated as being needed as suggested by **Tridgell**'s own teaching. This implementation would have been obvious because one of ordinary skill in the art would be motivated to save in expensive computation and time by “preventing excessive use of the strong signature algorithm”.

The limitations of claim 17 correspond to claim 4 and therefore are rejected in the same manner.

Claim 6

**Tridgell** did not appear to explicitly state *wherein said target file checking data stored in a cache are used with multiple updating requests received from a plurality of clients*. However, **Tridgell** demonstrated that it was known at the time of invention to provide information to multiple clients (*page 80, section 4.5, first three paragraphs*). It would have been obvious to one of ordinary skill

in the art at the time of invention to implement the rsync system with a plurality of clients as found in the *web* as found in **Tridgell**'s own teaching. This implementation would have been obvious because one of ordinary skill in the art would be motivated to make efficient file/data synchronization available the network thus reducing latency.

*Claims 10 and 14*

**Tridgell** did not explicitly state *wherein said compound file and said revised compound file comport with an RPM Package Manager format*. Official Notice is taken that it was known at the time of invention to make use of RPM Package Manager format. It would have been obvious to one of ordinary skill in the art at the time of invention to implement the file/data synchronization system of **Tridgell** with RPM format. This implementation would have been obvious because one of ordinary skill in the art would be motivated to provide a standard tool end users are already familiar with for delivering files/data for synchronization.

The limitations of claim 14 correspond to claim 10 and therefore are rejected in the same manner.

***Response to Arguments***

Applicant's arguments filed 17 August 2007 have been fully considered but they are not persuasive. Applicant argues no disclosure of cache as part of a non-volatile storage device. This is unpersuasive in view of the newly cited portions of **Tridgell** demonstrating caching in devices using non-volatile storage. Therefore, the rejections are maintained as above indicated.

### **Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

***Correspondence Information***

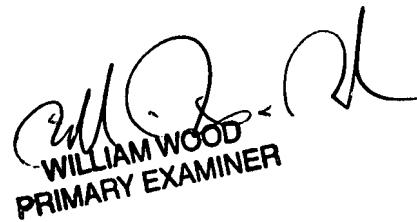

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Wood whose telephone number is (571)-272-3736. The examiner can normally be reached 10:00am - 4:00pm Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571)-272-3756. The fax phone numbers for the organization where this application or proceeding is assigned are (571)273-8300 for regular communications.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR systems, see <http://pair-direct.uspto.gov>. For questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)305-3900.
